PROFESSIONAL SUMMARY

Strategic intelligence and analytics professional with 9+ years translating competitive signals, market data, and technical analytics into executive-ready strategic narratives. Proven track record building high-visibility competitor intelligence reporting suites, shaping C-suite and board-level presentations, and scaling analytics capabilities across cross-functional teams. Combines advanced financial modeling and market analysis with hands-on technical fluency in SQL, Python, SAS, and Power BI to both build the analysis and tell the story that drives decisions.

SKILLS

Corporate Strategy | Competitive Intelligence | Market Insights | Financial Modeling | Strategic Reporting | Private Equity Analysis (Cost Structures, ROI, Normalized Earnings) | Pricing Strategy | KPI Design (Advanced) | Vendor Negotiations (Expert) | Excel (Advanced) | PowerPoint (Advanced) | Power BI (Advanced - Dynamic Measures & Visualization Design) | Tableau (Intermediate) | Python - Pandas, NumPy (Intermediate) | SQL (Advanced) - Snowflake, SAS Proc SQL | Macroeconomic Analysis (Advanced) | CPG Economics (Advanced) | Insurance Product Monitoring & Pricing Analytics | Cross-Functional Leadership | Executive Communications

WORK HISTORY

Consultant, Product Analytics

Liberty Mutual Insurance | Boston, MA | 09/2025 – 08/2026

Product Monitoring & Performance Analytics

- Monitored 4-6 personal property product launches end-to-end, building SAS/Proc SQL monitoring programs (2,000+ lines) supporting performance visibility for leadership and cross-functional teams
- Designed guardrail measures across 70+ new rating variables for a product launch, prioritizing by first-to-market status, impact, appetite alignment, and net-new classification
- Authored monitoring playbooks translating variable performance into business intent alignment for the Director of State Operations, supporting strategic launch decisions
- Applied core insurance monitoring pillars - segmentation, competitiveness, growth, profitability, and quality of results - to evaluate product health across launches

Technical Analytics & Visualization

- Queried and modeled insurance datasets using Snowflake SQL and Python; built predictive models using triangle-table methodologies to estimate quote-to-bind development timelines
- Developed Python-based customer profiling dashboards and dynamic, visually refined Power BI measures and dashboards supporting scalable product monitoring across new state launches
- Introduced a mathematical-proof validation requirement into AI-assisted analytics workflows to help ensure correctness of AI-generated outputs before use

Cross-Functional Collaboration

- Served as a technical resource for peer analysts on advanced analytics tooling and monitoring methodology; self-directed ramp into personal property insurance domain knowledge

Strategic Intelligence Lead, Senior Strategy Analyst III, Office of the CEO

Ahold Delhaize USA | Quincy, MA | 10/2022 - 08/2025

Strategic Reporting & Executive Enablement

- Architected/maintained a high-visibility competitor earnings intelligence reporting suite (via 10Q/10K analyses), providing insights derived from advanced analytics, which communicated a strategic narrative and provided actionable insights to the U.S. Executive Leadership team. Since its inception, this reporting suite has scaled to organization-wide production. Within 2 years, over 110 reports have been distributed to executive audiences with strategic, financial, and investor Q&A analyses. Organizational interest in scaling this report required training over 20 team members, which resulted in a 196% increase in report output, increased visibility into competitive dynamics to better serve ADUSA's diverse customer base
- Directed macroeconomic intelligence for the 2024 Extended Business Review (EBR), shaping the U.S. CEO's presentation to the Global Board; economic analysis findings on inflation, debt, disposable income, regional wages, delinquency rate

volatility, and consumer sentiment catalyzed 8 new critical business priorities that prioritize improving affordability for customers, widening access to food, and upholding our core value to provide a vibrant customer experience

- Architected/maintained a robust and cross-functional “CPG Snapshot” report uniting inflation data, 8 CPG financials via 10Q/10K SEC filings, price elasticity modeling (price/mix vs organic unit growth), and macroeconomic trends. The CPG Snapshot improved organizational negotiations with CPG vendors, allowing for strategic alignment across product sourcing, commercial, and category teams. The resulting insights enabled various CPG vendor management teams to reduce cost burdens passed to customers during times of abnormally high inflation levels, disrupting pricing pass-through from vendors
- Direct the U.S. advanced analytics and reporting teams each fiscal quarter to dissect eCommerce performance in preparation for global Ahold Delhaize's executive leadership's quarterly earnings calls with the investor community. Leveraging investors' Q&A sentiment associated with competitors' financial earnings releases to inform the global executive leadership team of high-frequency questions and topics, in addition to providing granular quarterly U.S. eCommerce updates

Market Intelligence & Competitive Strategy

- Influenced the eCommerce fulfillment strategy review, uncovering industry trends and profitability pressures across 3rd party delivery models; research findings drove operational shifts and informed mutually beneficial relationships with 3rd party delivery partners with the goal of improving customer satisfaction
- Analyzed Instacart's IPO lifecycle, preparing strategic finance leadership with insights into capital structure, IPO timing, and competitive implications

Cross-Functional Program Leadership

- Project-managed ADUSA's 2023 EBR U.S. fact base, aligning data from six corporate teams to deliver a comprehensive industry, competitor, and economic overview for global executive alignment
- Developed a consumer insights & advanced analytics interactivity model, mapping project intake, capacity, and resource bottlenecks across three centralized analytics teams: restructured resource deployment to a talent-specialized model, improving agility and project alignment

Business Transformation & Internal Strategy

- Conducted an in-office attendance audit, reverse-engineering attendance data from visual screenshots, identifying trends, and resulting in integrating a structured in-office policy and improved cross-departmental collaboration and cultural uplift
- Redesigned KPI reporting for growth drivers, introducing reporting buffers and quality assurance that reduced prep time by 30% while improving reporting precision and executive confidence

High-Impact Special Projects

- Valuation-driven business case: Created a valuation model for AI-based automated reporting, collaborating with investment leadership to model the cost of manual labor vs. automation
- Regional technology adoption research: Delivered custom intelligence briefs for 5 private regional grocers by synthesizing press releases, tech vendor case studies, and adoption timelines, supporting local brand strategy teams with innovation guidance
- CPG financial volatility analysis: Scraped and analyzed 10 years of earnings data from top U.S. CPGs; identified earnings disruptions tied to cost structure transformations, improving internal awareness of external margin pressures
- Market share advanced analytics: Created a new methodology using a logic-based analysis to discover store count deviations against share growth dynamics, isolating overlooked regional competitors eroding local market share in both eCommerce and brick & mortar formats

MBA Marketing Intern

Echosens North America | Waltham, MA | 06/2021 - 09/2021

- Improved consultant contracting processes, reducing turnaround times and enhancing workflow efficiency
- Designed and launched a Tableau dashboard for real-time sales tracking, empowering data-driven decision-making
- Created a dynamic product flipbook and led a strategic email campaign that increased engagement rates

Corporate Development Account Executive (Field Sales)

Intralinks | Arlington, VA | 10/2018 - 08/2020

- Held a \$2.2M annual target, successfully managing a portfolio of 70 upper-market accounts, negotiated strategic agreements, and achieved over 50% of annual quota prior to H2-2020
- Promoted within six months for exceptional performance, surpassing expectations on a two-year track
- Established expertise in market dynamics, M&A cycles, and client relationship management

Associate Staffing Consultant & Account Executive

Beacon Hill Staffing Group | Boston, MA | 07/2017 - 10/2018

- Partnered with Boston technology companies to source top-tier software engineering and data science talent, delivering solutions that drove client success

EDUCATION**Boston College - MBA & MSF (2020-2022)**

Dean's Scholarship Recipient. Teaching Assistant: Managing People & Organizations (Graduate); Negotiations (Undergraduate)

Providence College - B.S. in Biology & Business Studies Certificate (2013-2017)
